

The Facial Of The Future.

The Future Of Your Business.

geneo

3 TECHNOLOGIES.
1 INNOVATIVE SKINCARE
PLATFORM.

OXYGENEO

Oxypods Create Oxygen-WITHIN
The Skin — Not Just On The Skin

Geneo's oxygenation process uses the power of the all-natural ingredients found in our unique OxyPods. to bring the body's naturally-occurring oxygen to the skin's surface and encourage the release of carbon dioxide. The active ingredients in an OxyPod are twice as potent as other facial serums. When they react with the Geneo Primer Gel, they create a gentle, non-invasive exfoliation, and trigger oxygenation INSIDE the skin.

ULTRASOUND

Ultrasound Waves Stimulate, Exfoliate
And Condition The Skin For Treatment

Ultrasound waves stimulate micro-vibrations of the skin, increasing the permeability of the outer layer of the skin and improving cellular metabolism, resulting in increased absorption of the all-natural ingredients.

NEO-MASSAGE

Finish With A Relaxing,
Nourishing Massage

Geneo Serums are introduced through massage, allowing the all-natural ingredients to be absorbed into the skin. Deliver powerful antioxidants, vitamins, nutrients, and purifying ingredients while creating a refreshed and revitalized glow.

OUR NATURAL
INGREDIENTS

Oxypods: Little Pods
That Deliver Big Results

- All-natural ingredients
- Formulated to encourage the release of CO2 to enhance oxygenation
- Customizable to meet the needs of every skin type
- Twice as potent as serums
